

## **nz - clientstt - How to Deal With Clients Who Won't Pay - Collection Call Best Practices**

### **Clients | Buyatab**

In Computer science, client-server is a software architecture model consisting of two parts, client systems and server systems, both communicating over a computer network or on the same computer. A client-server application is a distributed system made up of both client and server software.

Client server application provide a better way to share the workload. The client process always initiates ...
